

SpotCell 2500Xe Alternative Cables

This bulletin is to inform you of the latest Application Note concerning the use of alternative (non-Spotwave) cables in Spotwave 2500Xe installations.

The Application Note includes graphs and examples to help you determine the maximum cable length that can be used, based on the RF Loss and DC Resistance characteristics of the cable.

Information on how much extra cable can be used when a power inserter is added to a 2500Xe system is also discussed.

This Application Note also includes specifications and part numbers of alternate cables that can be used with the SpotCell 2500Xe system.

A PDF of the Application Note can be downloaded from:
